

## Smart-View Ferrule Maintenance

(US Patent # 6881111)

### Daily Maintenance

- Take system apart after each use and rinse with fresh water.
- If debris is still visible on the splines (internal and external) after rinsing, take a soft brush (ie toothbrush) and scrub the splines with just fresh water or soapy water.
- If your ferrule is still not actuating properly, contact customer service for assistance.

### Storage and Handling

- Paddle may be stored as 1pc after it has been rinsed with fresh water.
